

Federal Energy Regulatory Commission

§ 367.9

must not be controlling as to the arrangement or sequence in report forms that may be prescribed by the Commission.

§ 367.4 Numbering system.

(a) The account numbering plan used in this part consists of a system of three-digit whole numbers as follows:

- (1) 100-199, Assets and other debits.
- (2) 200-299, Liabilities and other credits.
- (3) 300-399, Property accounts.
- (4) 400-432 and 434-435, Income accounts.
- (5) 433, 436 and 439, Retained earnings accounts.
- (6) 457-458, Revenue accounts.
- (7) 500-599, Electric operating expenses.
- (8) 800-894, Gas operating expenses.
- (9) 900-949, Customer accounts, customer service and informational, sales, and general and administrative expenses.

(b) The numbers prefixed to account titles are to be considered as parts of the titles. Each service company, however, may adopt for its own purposes a different system of account numbers (*See also* General Instructions in § 367.3(d)) provided that the numbers prescribed in this part must appear in the descriptive headings of the ledger accounts and in the various sources of original entry; however, if a service company uses a different system of account numbers and it is not practicable to show the prescribed account numbers in the various sources of original entry, the reference to the prescribed account numbers may be omitted from the various sources of original entry. Each service company using different account numbers for its own purposes must keep readily available a list of the account numbers that it uses and a reconciliation of those account numbers with the account numbers provided in this part. It is intended that the service company's records must be kept so as to permit ready analysis by prescribed accounts (by direct reference to sources of original entry to the extent practicable) and to permit preparation of financial and operating statements directly from the records at the end of each accounting period according to the prescribed accounts.

§ 367.5 Accounting period.

Each service company must keep its books on a monthly basis so that for each month all transactions applicable to the account, as nearly as may be ascertained, must be entered in the books of the service company. Amounts applicable or assignable to a single or group of associate and non-associate companies must be segregated monthly. Each service company must close its books at the end of each calendar year unless otherwise authorized by the Commission.

§ 367.6 Submittal of questions.

To maintain uniformity of accounting, service companies must submit questions of doubtful interpretation to the Commission for consideration and decision.

§ 367.7 Item list.

Lists of items appearing in the texts of the accounts or elsewhere in this part are for the purpose of indicating clearly the application of the prescribed accounting. The lists are intended to be representative, but not exhaustive. The appearance of an item in a list warrants the inclusion of the item in the account mentioned only when the text of the account also indicates inclusion inasmuch as the same item frequently appears in more than one list. The proper entry in each instance must be determined by the texts of the accounts.

§ 367.8 Extraordinary items.

Extraordinary items are to be recognized according to the rules which are considered generally accepted accounting principles. These items are related to the effects of events and transactions that have occurred during the current period and that are of an unusual nature and infrequent occurrence. Each item recognized as extraordinary must be disclosed in the notes to financial statements (*See* Accounts 434 and 435 in §§ 367.4340 and 367.4350).

§ 367.9 Prior period items.

(a) Items of profit and loss related to the following must be accounted for as prior period adjustments and excluded
